

1. Job:

- Southern Sierra Reforestation Technician

2. Cover Letter:

- Add expected date for B.S.
- Make a statement in the letter about being available for the full research term.
- Do you have any forestry specific experience or education that you could point to in the letter?
- Last paragraph shows that you have done some research into the group. Nice!

3. Resume:

- Flip arrangement of Experience with most recent at the top.

4. General thoughts:

- Both your letter and resume were well done. I don't see any major issues with them. Trick with the letter is to give them a hook to want to move your applications past the first stage of application review.
