

1. Job:

- Brown Tree snake Research Associate

2. Cover Letter:

- Good job.

3. Resume:

- The spadefoot toad work should be listed more as a research experience. Perhaps as another listing in the wildlife and environmental science experience section?
- List R Studio as R/RStudio. The thing you want to highlight here is R experience. RStudio is just one way of many to interact with R.

4. General thoughts:

- Nice job. Your cover letter was particularly good as you provided details on your experience that should be of interest to those reviewing the applications.
