

1. Job:

- Mountain lion research and ecology intern

2. Cover Letter:

- Remove the “Mountain Lion Research and Ecology Intern” from the header. Looks like that is your current gig!
- Add address/contact details for Jeff Sikich. At least the email.
- “greenbrier” should be “greenbriar”?

3. Resume:

- Instead of RStudio, just list R or list it as R/RStudio. RStudio is one way to work with R and it is using R that employers will find useful.

4. General thoughts:

- Good job overall! One of the internship requirements was “Must have previous field experience working on a wildlife project”. You did a really nice job in the second paragraph of your cover letter of highlighting how you met that requirement with the camera traps and the greenbriar/bird next study.
